

Regenerative Agriculture Venture

CULTIVATING RESEARCH FOR SOIL CAPITAL

INITIATIVE BY

IN PARTNERSHIP WITH

HSBC

الأول
SAB

SUPPORTED BY

Co-funded by the
European Union

The Regenerative Agriculture Venture Programme aims to empower and upskill researchers and students who are addressing fundamental agricultural challenges of the MENAT region.

We are looking at solutions related to hunger & nutrition, climate change mitigation & adaptation, carbon sequestration, soil health, salinity, water scarcity, desertification, biodiversity loss & food security.

By necessity, these practices must provide net beneficial economic, environmental and social impacts for farmers and local communities if they are to be sustainable long term.

You will have access to:

Community: Online digital community platform

Courses: Free range of online self-paced courses

Talks: Expert talks & workshops on innovation, trends & entrepreneurial skills

Mentorship: Specialist training & world-class mentorship

You will benefit from:

Exposure: Regional exposure & networking across the programme

Acceleration: Access potential funding & incubation

Grants: Top 3 Finalists win one of three \$10,000 grants

Scale: develop your research into a viable business solution

Join this transformative journey to develop entrepreneurship skills in the domain of research-based regenerative agriculture solutions.

*Your solutions must be applicable and benefit agricultural conditions in the Middle East, North Africa and Turkey regions.
